

## Our First Program

Output in C++

```
[ cout << " apna college "; ]
```

C++ case sensitive  
↓  
lower      ↓  
            UPPER

The screenshot shows a code editor with a file named `code.cpp`. The code is as follows:

```
1 #include <iostream>
2 using namespace std;
3
4 int main() {
5     cout << "apna college";
6     return 0;
7 }
8
9
```

The terminal at the bottom shows the command `g++ code.cpp` being executed. A callout box points to the terminal with the text "for Mac users". Another callout box at the bottom states: "Compile command for Window users is `g++ -o code code.cpp`".

code.cpp

```
1 #include <iostream>
2 using namespace std;
3
4 int main() {
5     cout << "apna college";
6     return 0;
7 }
```

for Mac users

```
apnaccollege@Shradha YTSeries % g++ code.cpp
apnaccollege@Shradha YTSeries % ./a.out
```

Run command for Window users is **code.exe**

code.cpp

```
1 #include <iostream>
2 using namespace std;
3
4 int main() {
5     cout << "apna college";
6     return 0;
7 }
```

for Window users **g++ -o code code.cpp && code.exe**

```
apnaccollege@Shradha YTSeries % g++ code.cpp
apnaccollege@Shradha YTSeries % ./a.out
apna college%
apnaccollege@Shradha YTSeries % g++ code.cpp && ./a.out
apna college%
apnaccollege@Shradha YTSeries %
```

code.cpp

```
1 #include <iostream>
2 using namespace std;
3
4 int main() {
5     return 0;
6 }
7
8 //Boilerplate Code - comment
9
10
```
